C8 scanned material · approved 3× sampling

Private recovery on preserved C5.1. Same geometry and approved dusk lighting. Not a new physical-rock benchmark.

C8's documented Poly Haven Marble Rock 03 + Rock Face 03 family is reconstructed. Features are enlarged threefold by reducing repeats, not by adding repetitions.

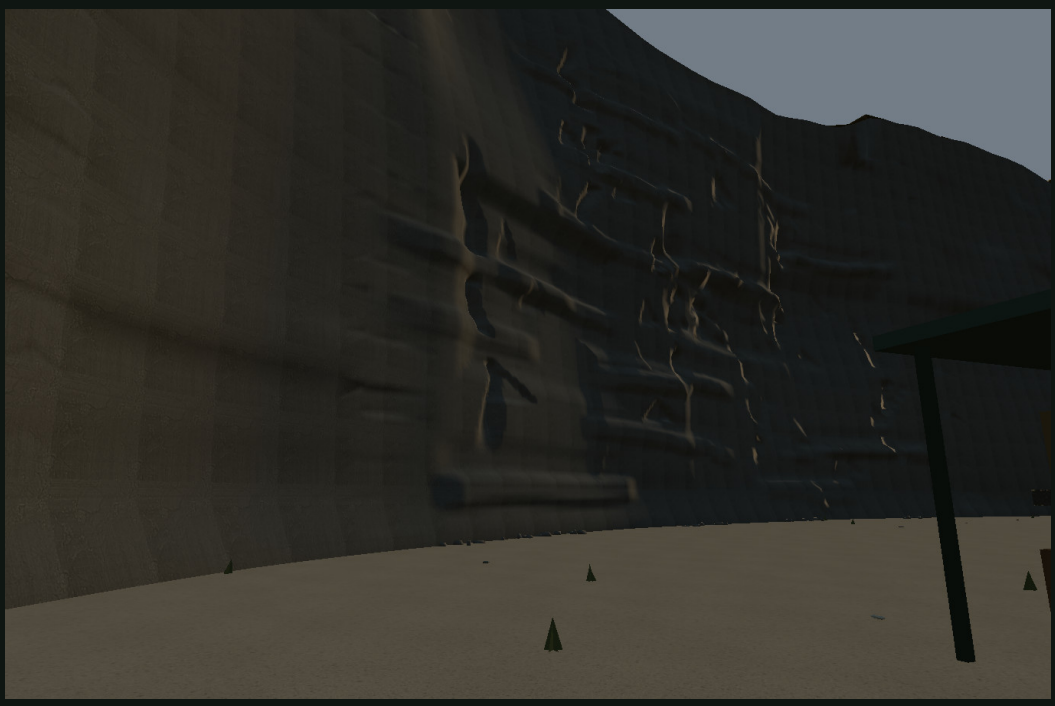

Historical approved C8 screenshot matching is PENDING: the companion Evidence ZIP was not available. The C6.2 host and original mask source are missing. Reconstructed masks and unchanged C5.1 are explicitly documented.

The next pages are matched C5.1 / reconstructed C8 pairs. Neutral lights are separate browser-only diagnostics. Original PNGs and camera metadata are in the offline gallery.

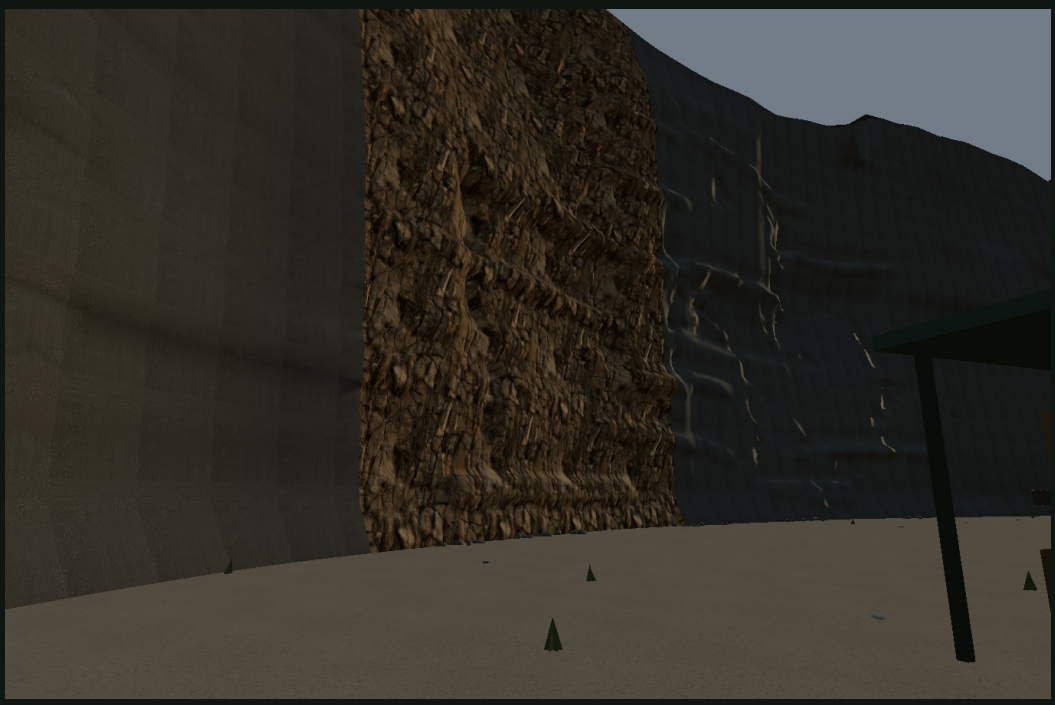

Public visitor position 1

Valid public walking location; controlled orientation toward the selected sector. · approved dusk

Preserved C5.1

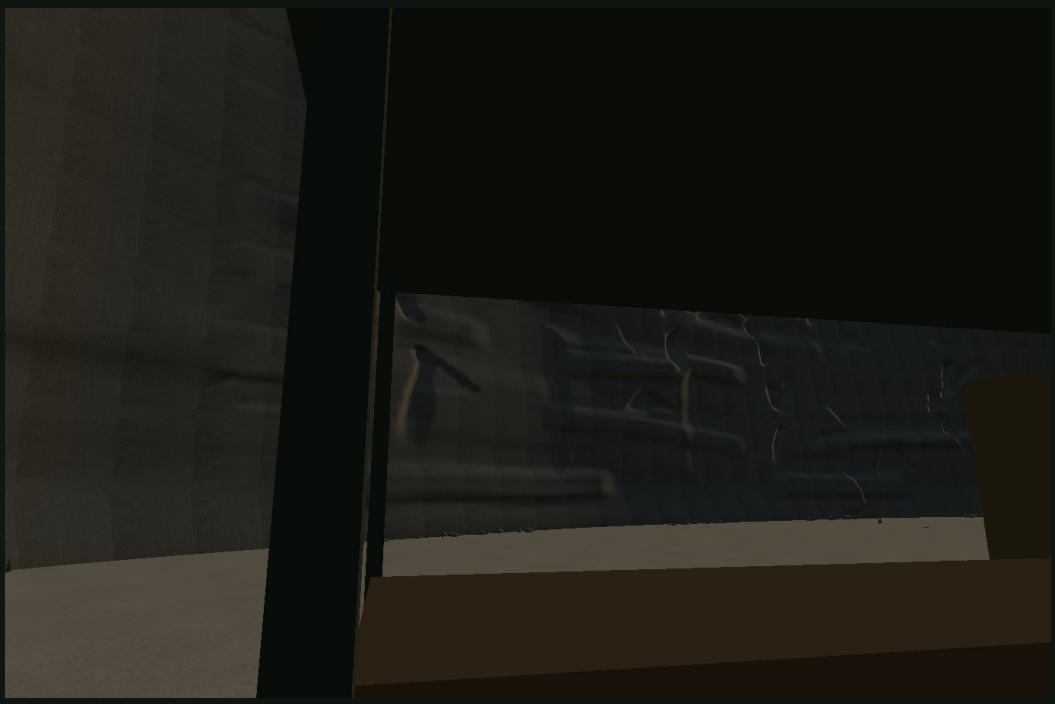

Reconstructed C8 3× · same C5.1 geometry

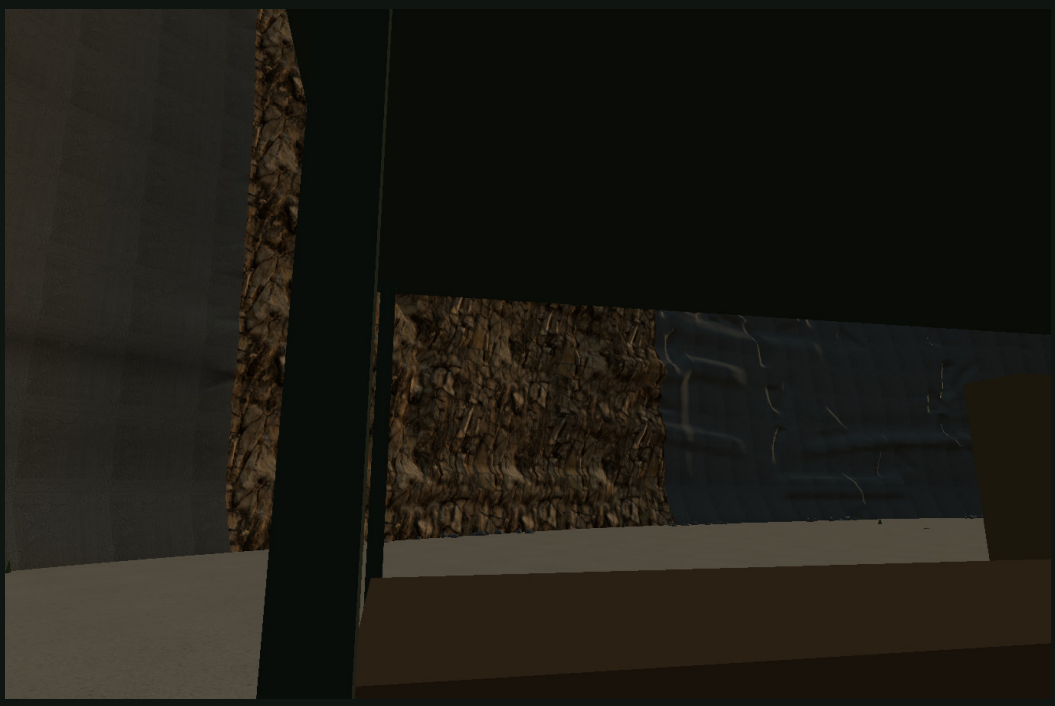

Public visitor position 2

Valid public location; existing stall occlusion is retained. · approved dusk

Preserved C5.1

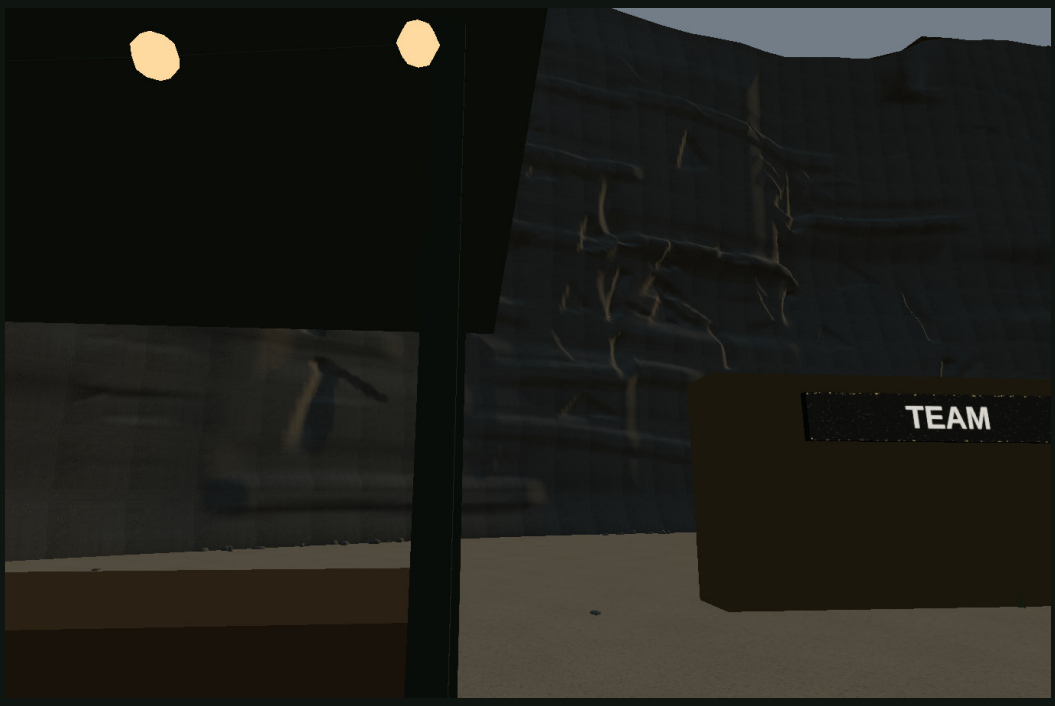

Reconstructed C8 3× · same C5.1 geometry

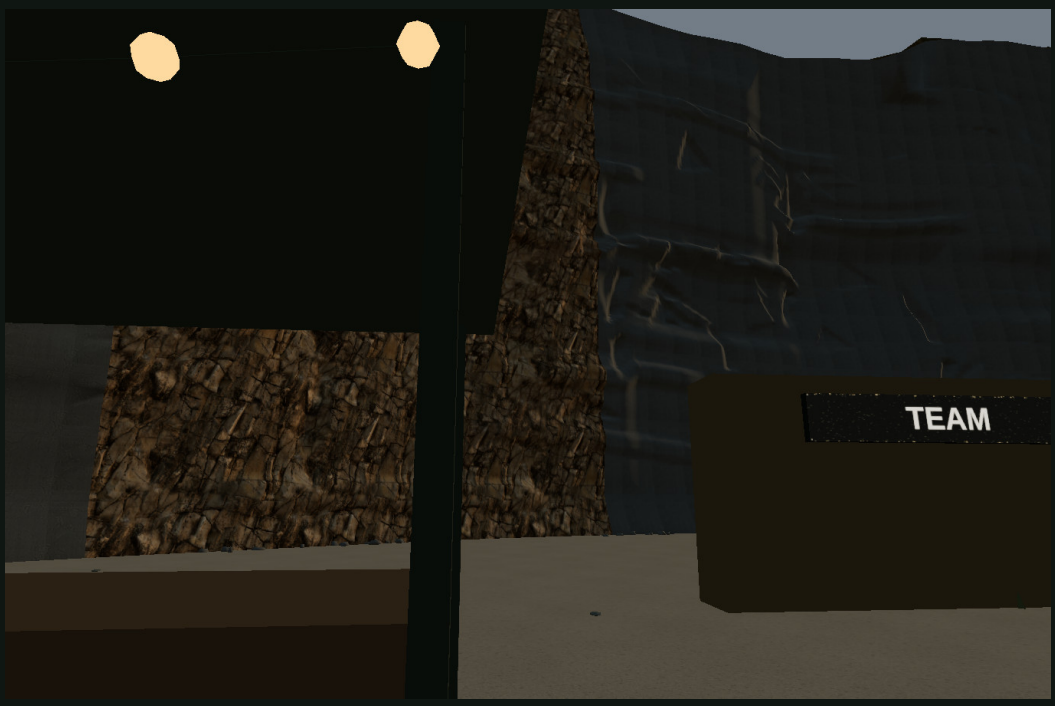

Public visitor position 3

Valid public location; existing stall occlusion is retained. · approved dusk

Preserved C5.1

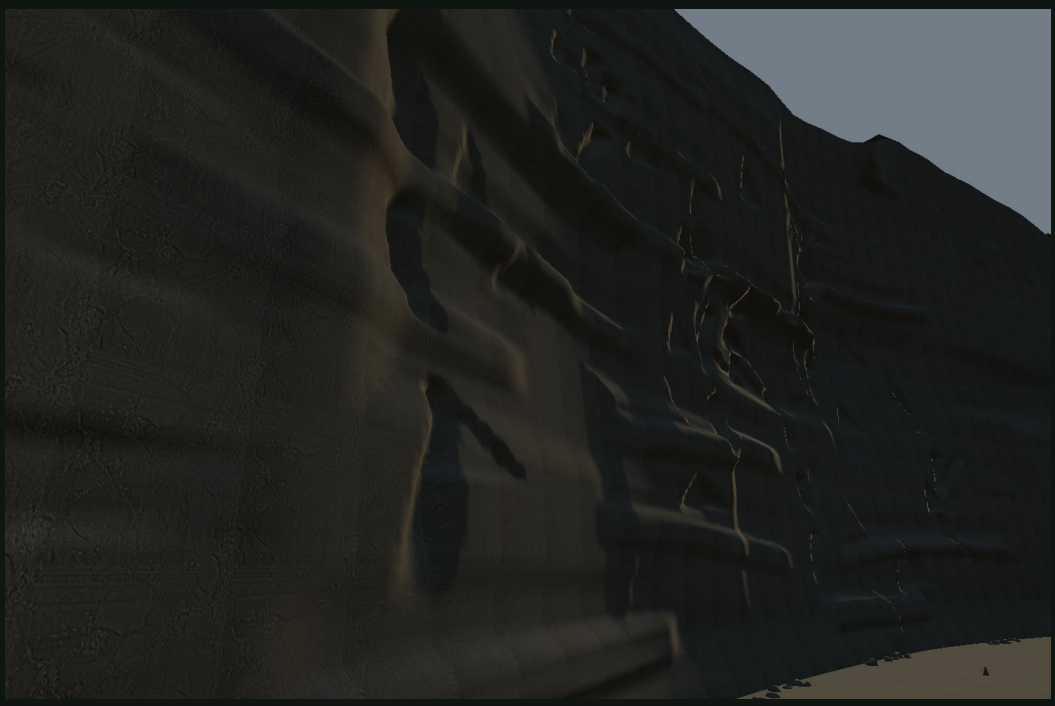

Reconstructed C8 3× · same C5.1 geometry

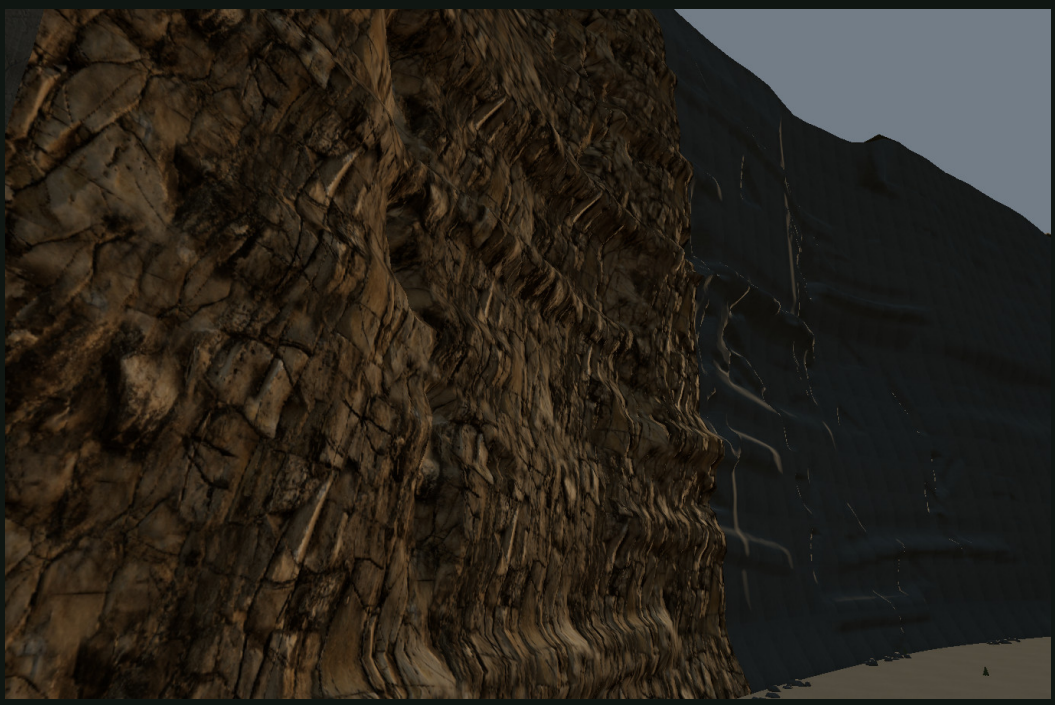

Medium-distance material inspection

Non-public controlled inspection, approximately 15m; no walking boundary changed. · approved dusk

Preserved C5.1

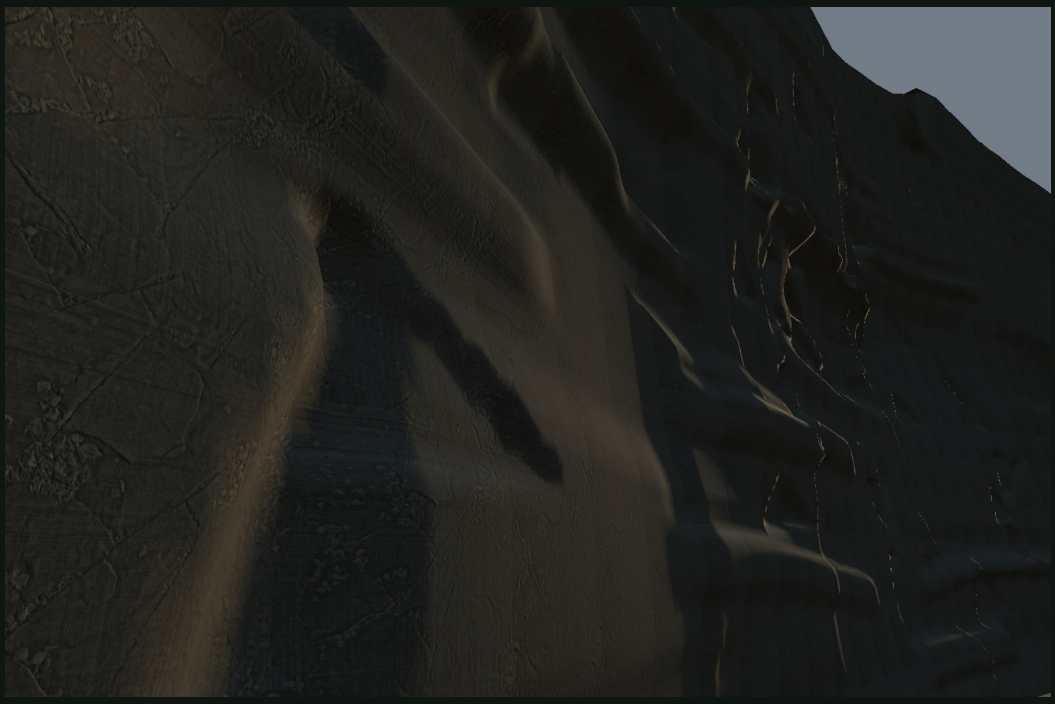

Reconstructed C8 3× · same C5.1 geometry

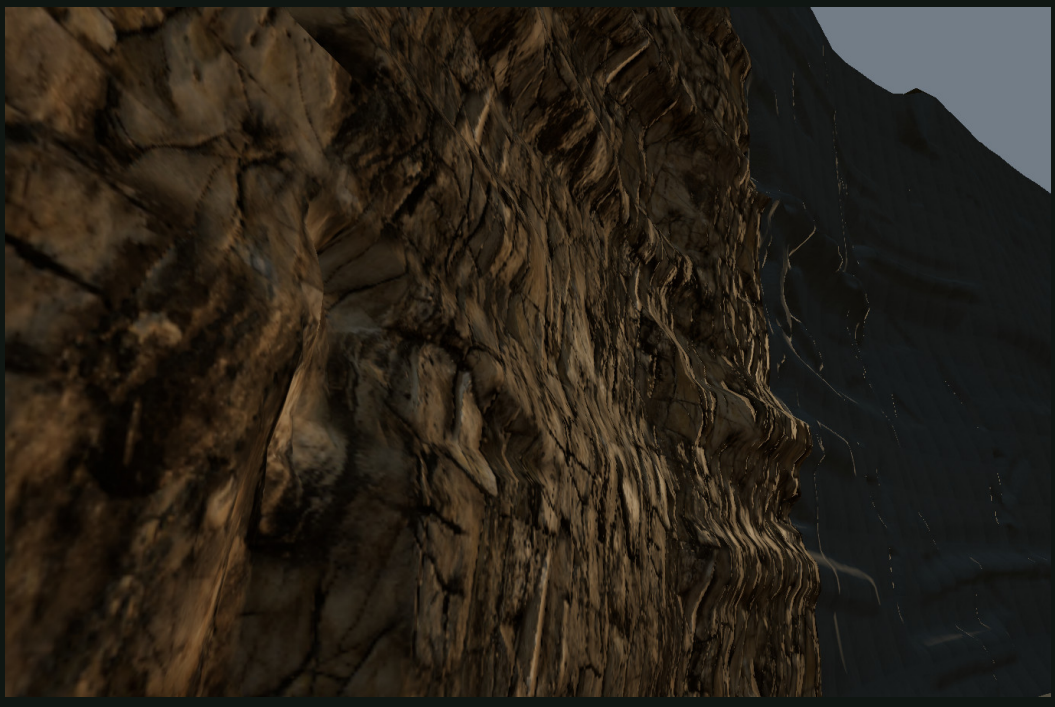

Close scanned mineral detail

Non-public close inspection; material depth comes from the scan normal, not new rock geometry. · approved dusk

Preserved C5.1

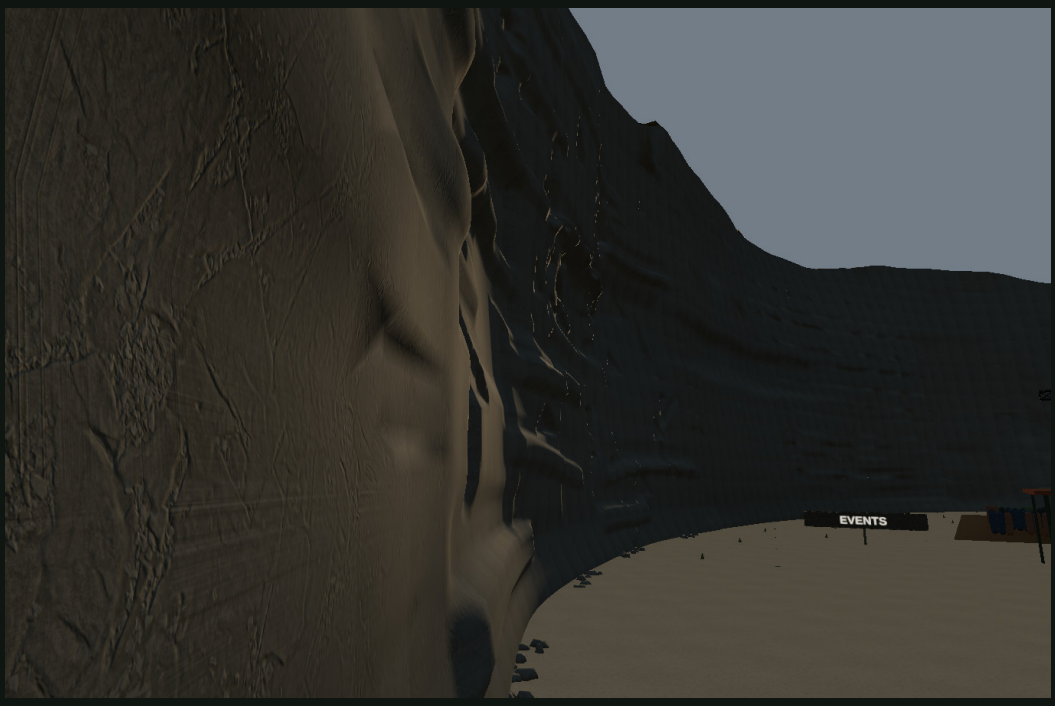

Reconstructed C8 3× · same C5.1 geometry

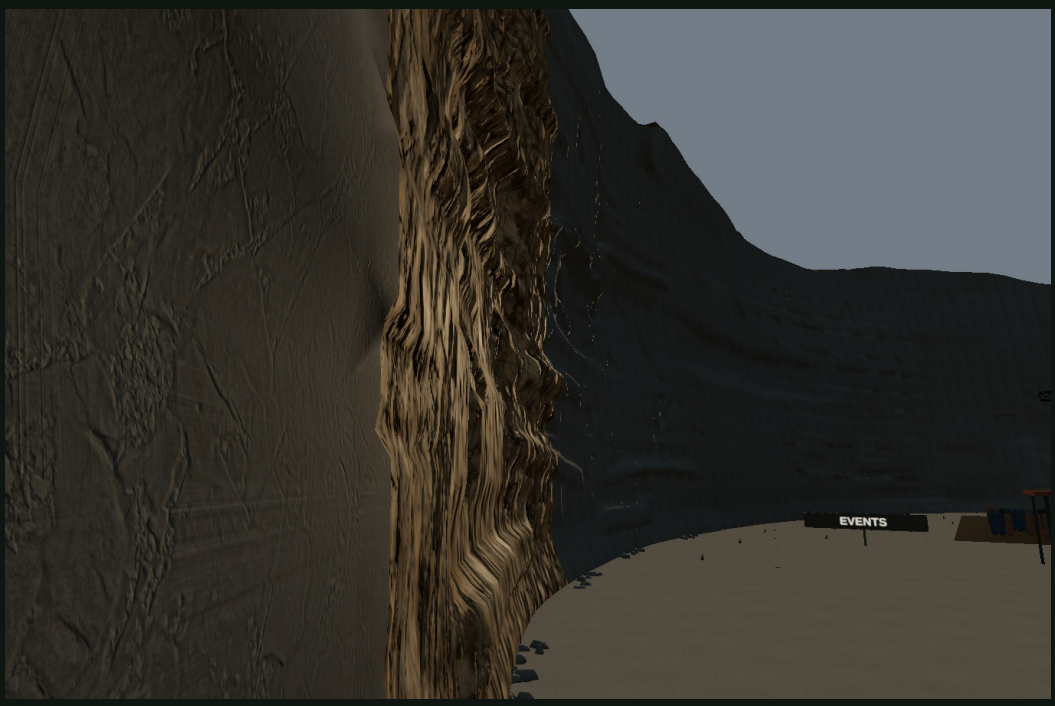

Along-wall view

Non-public oblique inspection; unchanged C5.1 relief. · approved dusk

Preserved C5.1

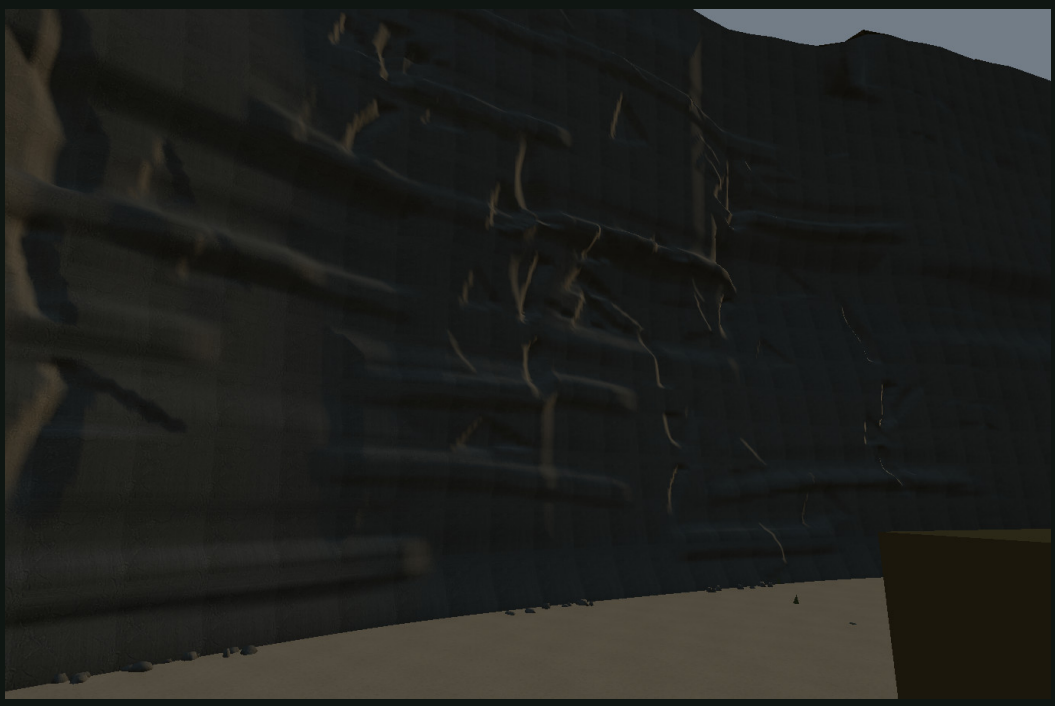

Reconstructed C8 3× · same C5.1 geometry

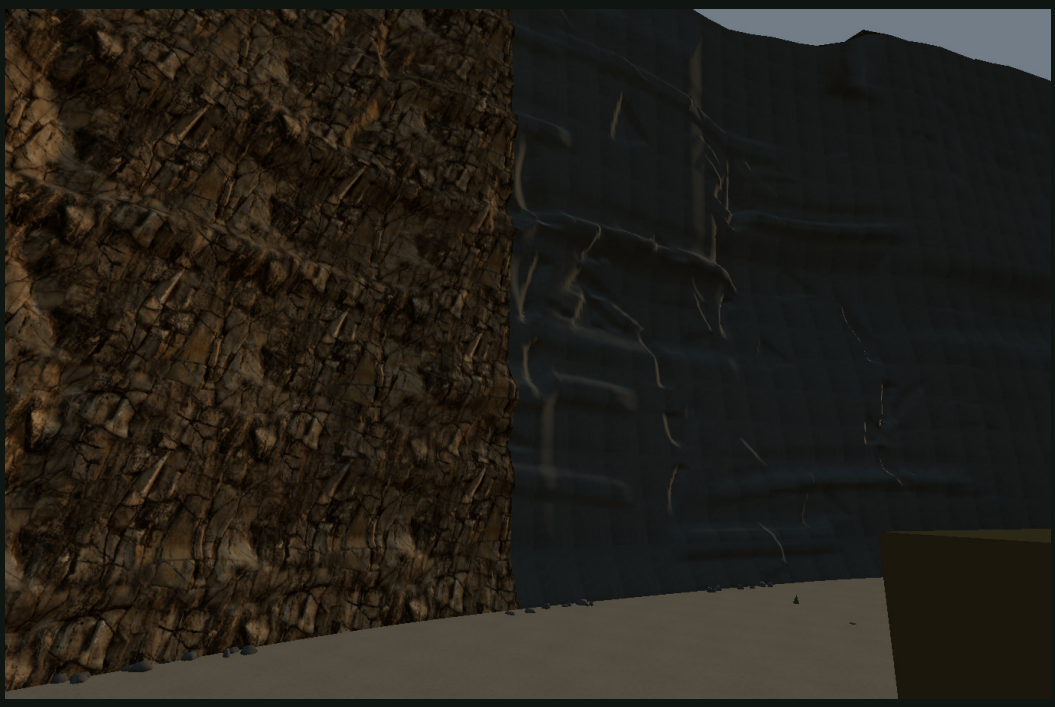

Adjacent left material surface

Non-public inspection of the existing Wall_14/Wall_15 material boundary. · approved dusk

Preserved C5.1

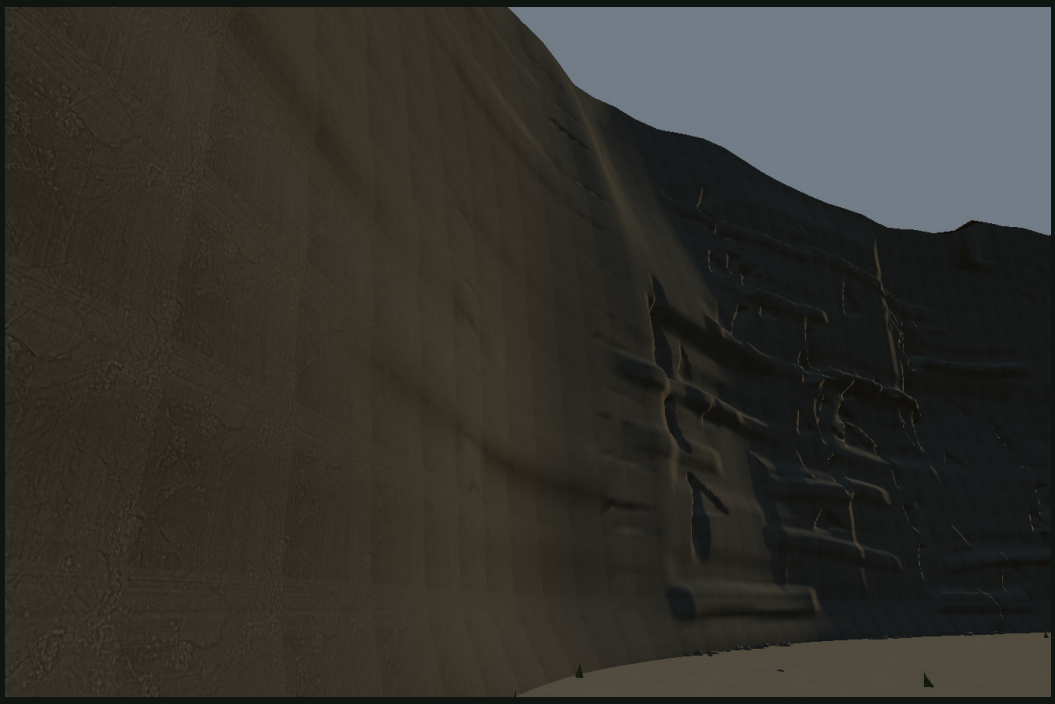

Reconstructed C8 3× · same C5.1 geometry

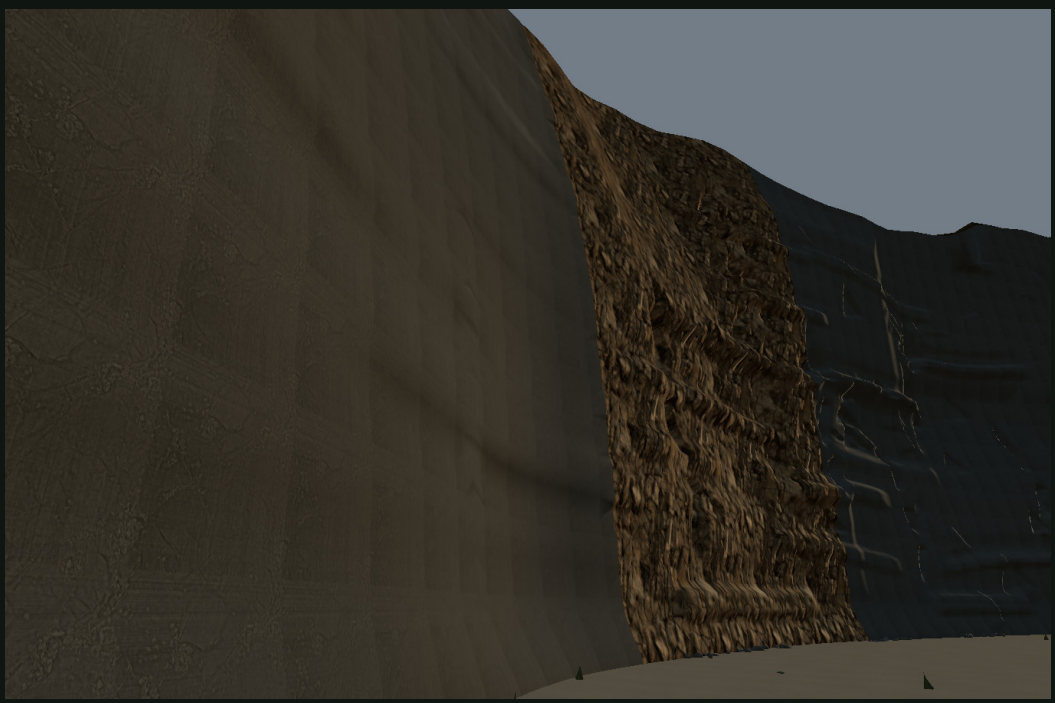

Adjacent right material surface

Controlled orientation toward Wall_15's unchanged rim-side neighbour. · approved dusk

Preserved C5.1

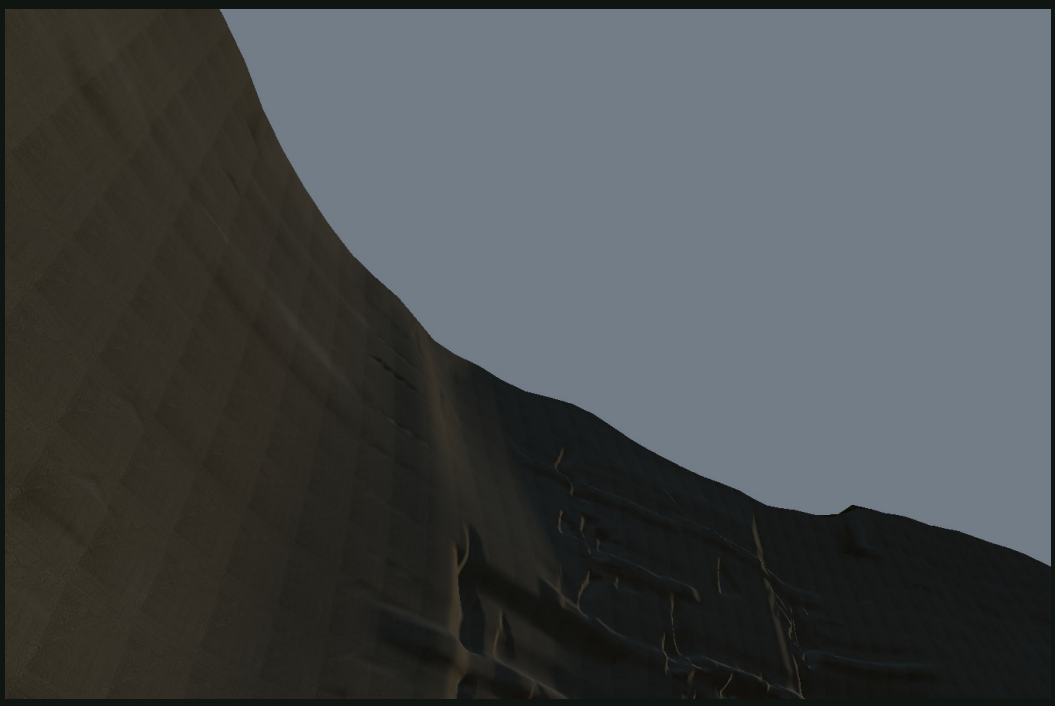

Reconstructed C8 3× · same C5.1 geometry

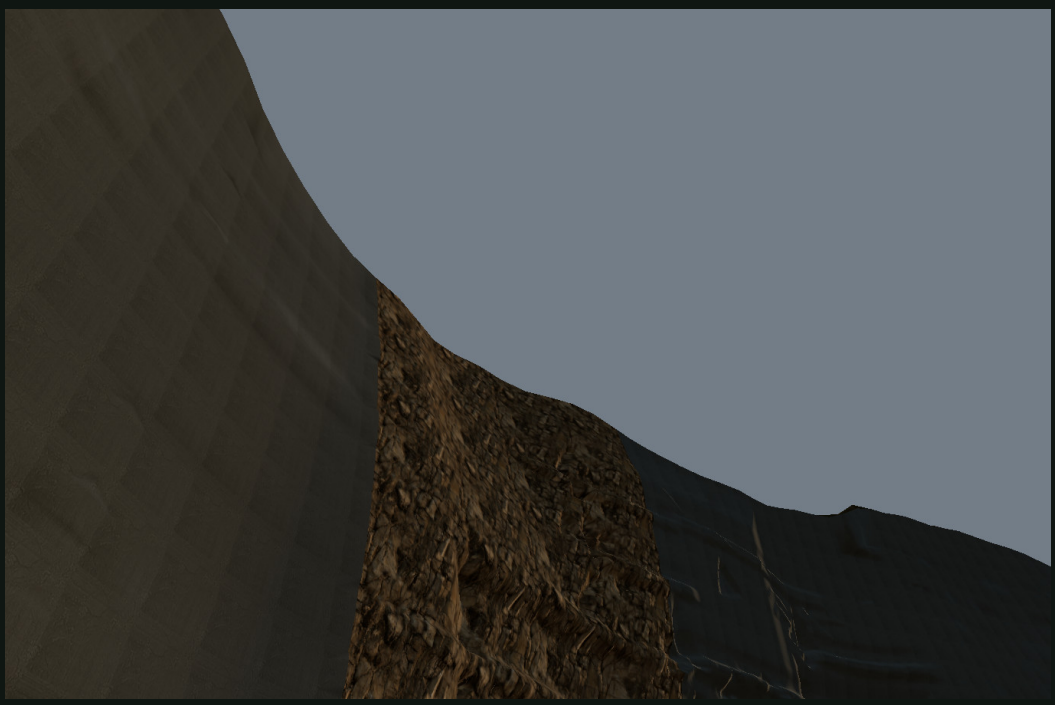

Upper rim

Valid public location looking upward; original geometry and sky retained. · approved dusk

Preserved C5.1

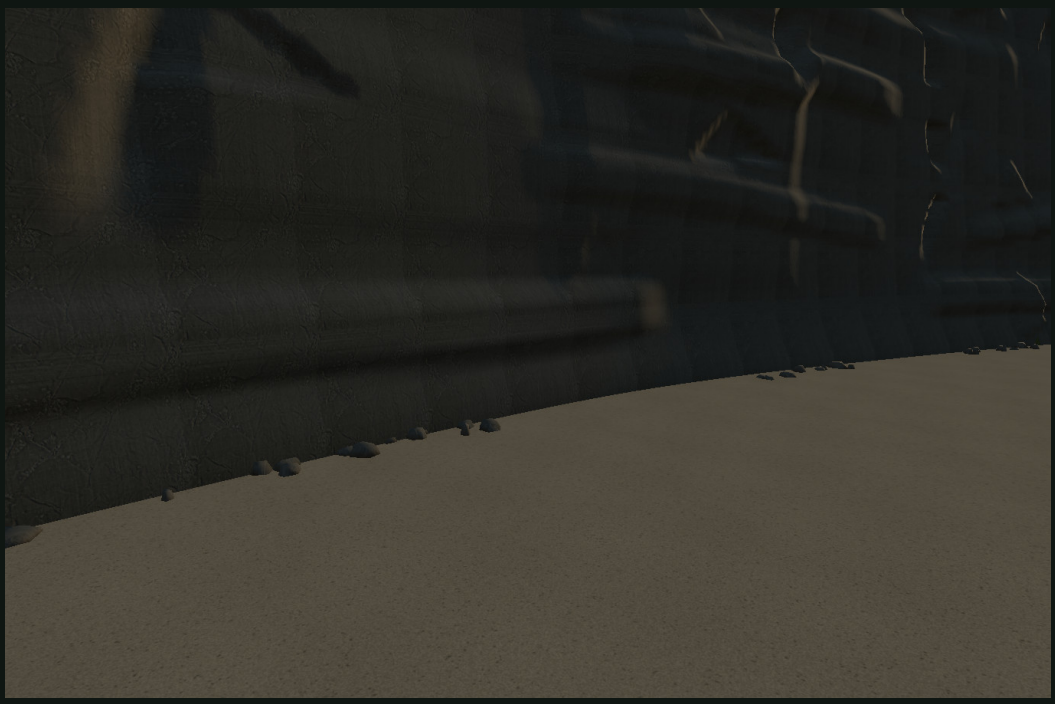

Reconstructed C8 3× · same C5.1 geometry

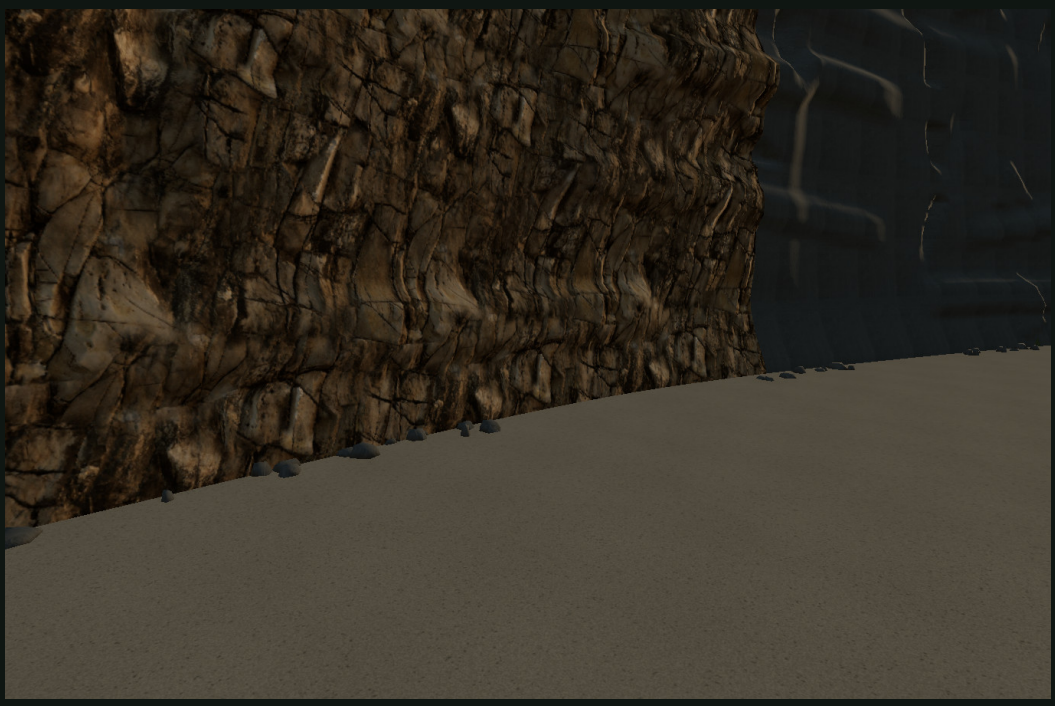

Rock-to-ground contact

Non-public contact inspection; no floor or scree geometry altered. · approved dusk

Preserved C5.1

Reconstructed C8 3× · same C5.1 geometry

Hub and scaffold

Original public hub spawn and Phase 1 scaffold composition. · approved dusk

Preserved C5.1

Reconstructed C8 3× · same C5.1 geometry

Tunnel exit and quarry reveal

Original protected tunnel-exit pose; entrance/tunnel reconstruction is out of scope. · approved dusk

Preserved C5.1

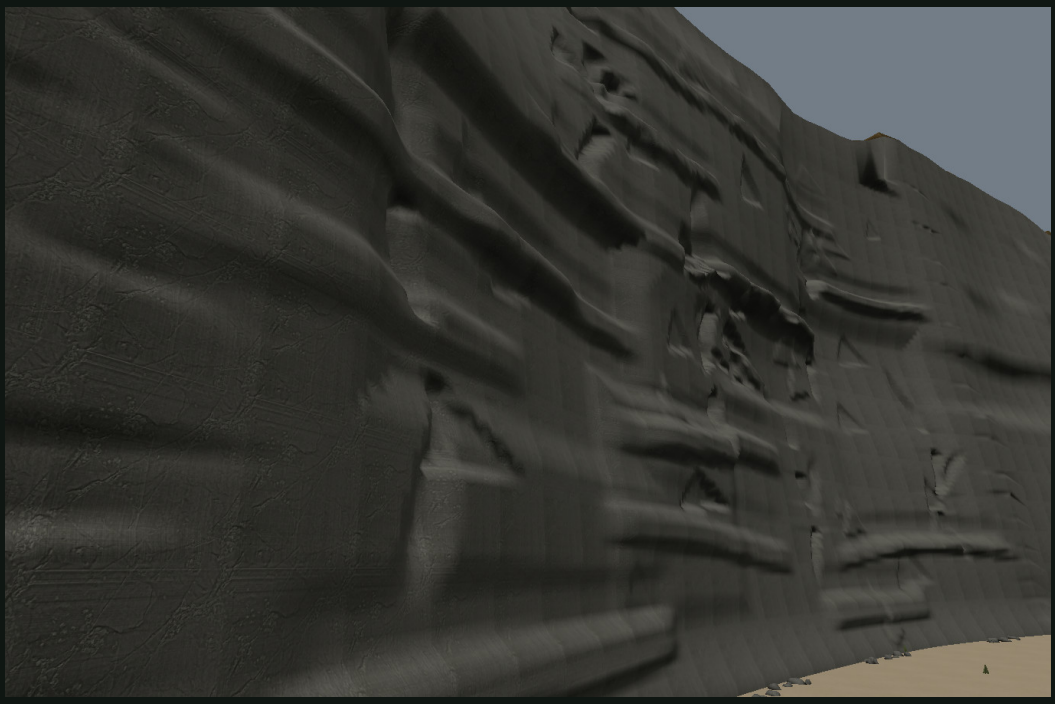

Reconstructed C8 3× · same C5.1 geometry

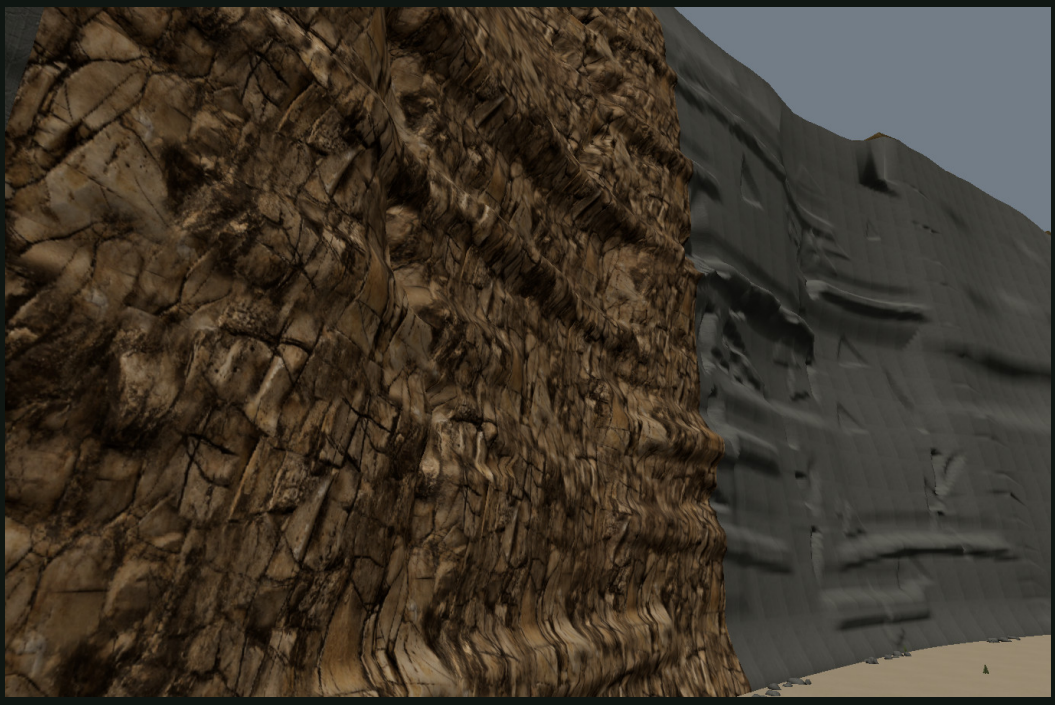

Neutral material inspection

Temporary browser-only neutral lights; same maps, exposure, fog and geometry. · temporary neutral diagnostic

Preserved C5.1

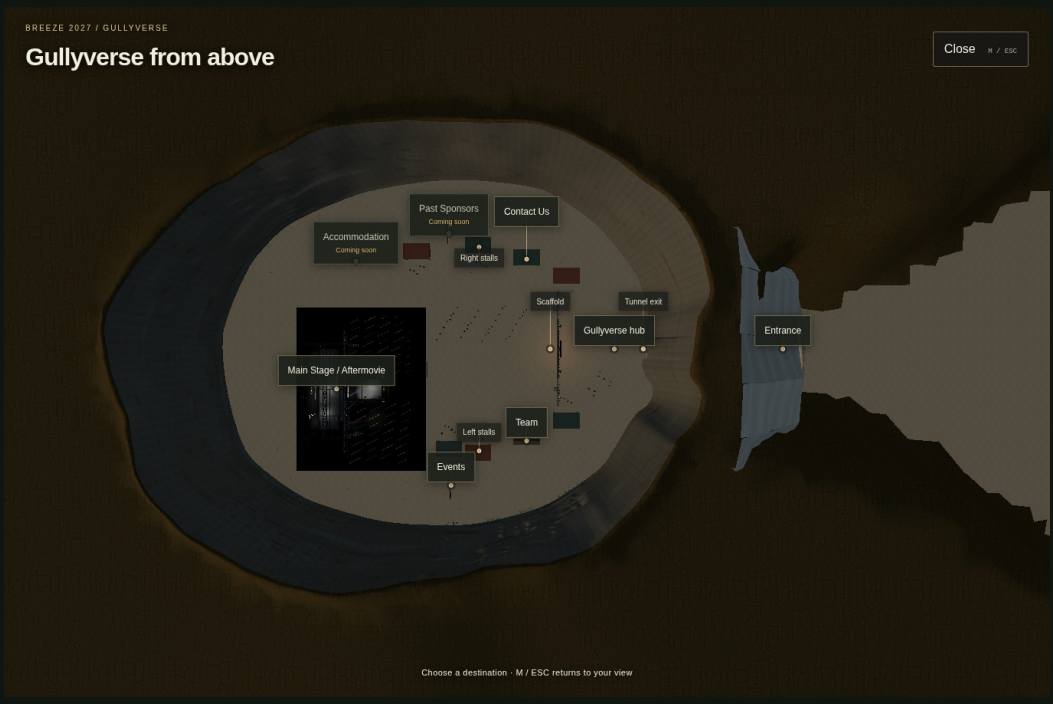

Reconstructed C8 3× · same C5.1 geometry

Aerial map

Actual approved map opening and camera; original coordinates and markers. · approved dusk

Preserved C5.1

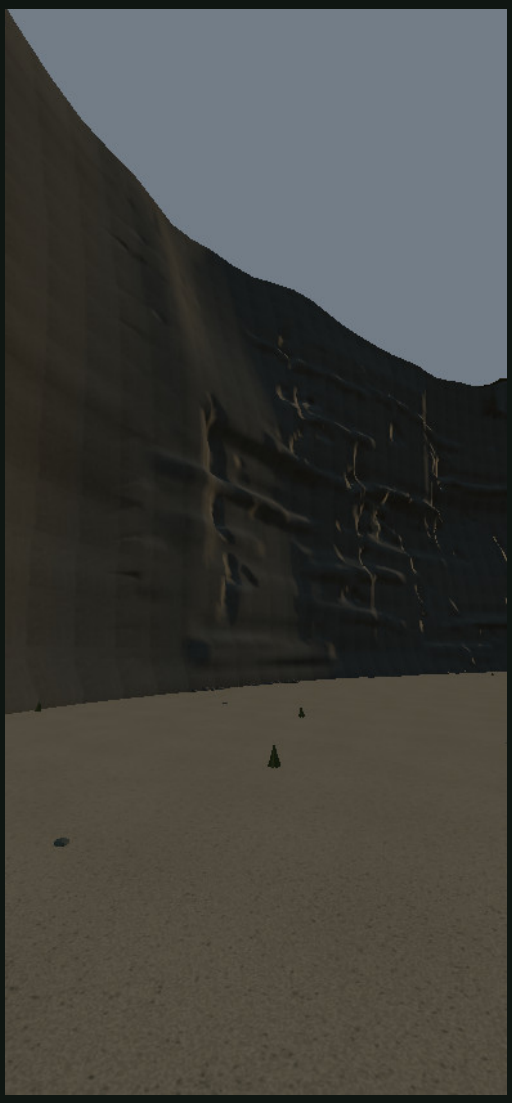

Reconstructed C8 3× · same C5.1 geometry

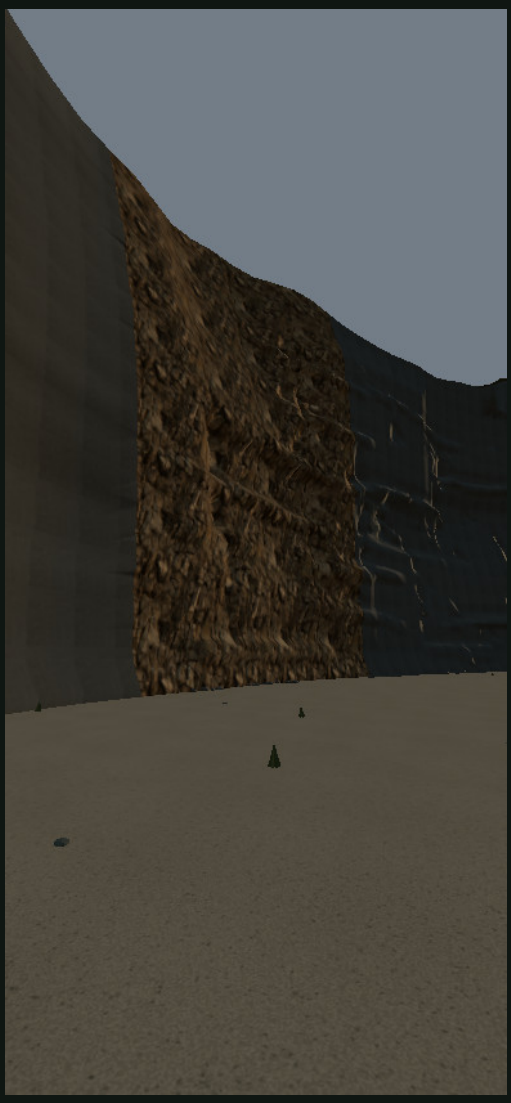

Public visitor position 1

Valid public walking location; controlled orientation toward the selected sector. · approved dusk

C5.1

C8 3×

Hub and scaffold

Original public hub spawn and Phase 1 scaffold composition. · approved dusk

C5.1

C8 3×

Tunnel exit and quarry reveal

Original protected tunnel-exit pose; entrance/tunnel reconstruction is out of scope. · approved dusk

C5.1

C8 3×

Aerial map

Actual approved map opening and camera; original coordinates and markers. · approved dusk

Final build control: c51 · scale 0

Final-build control or diagnostic. The full PNG and original metadata are retained in the gallery.

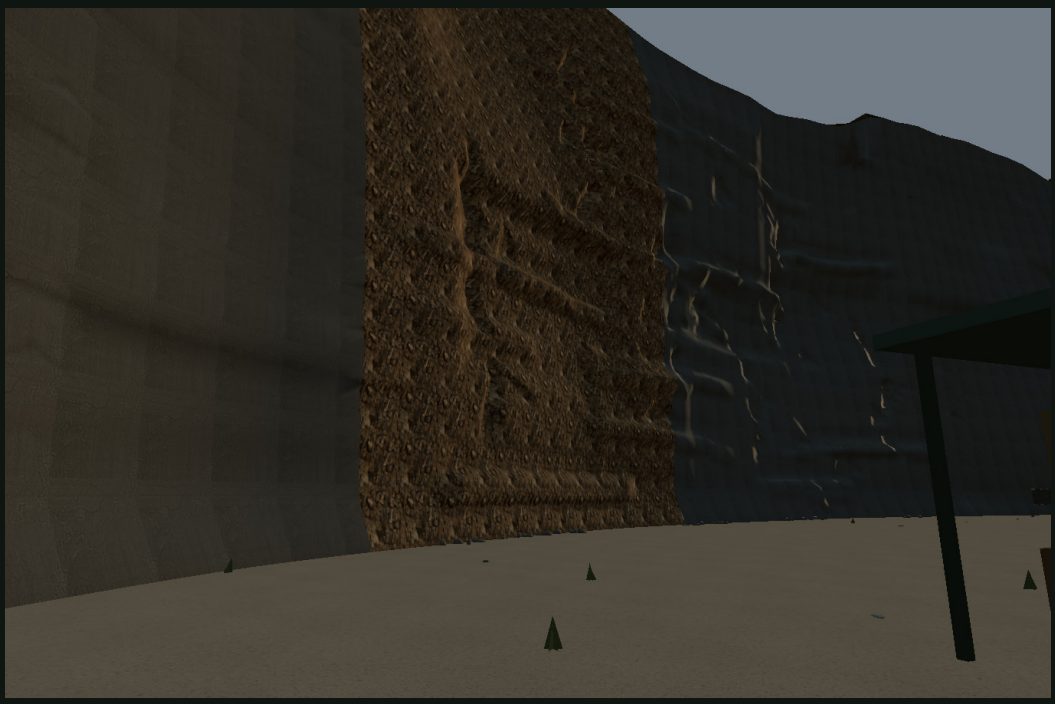

Final build control: c8-3x · scale 3

Final-build control or diagnostic. The full PNG and original metadata are retained in the gallery.

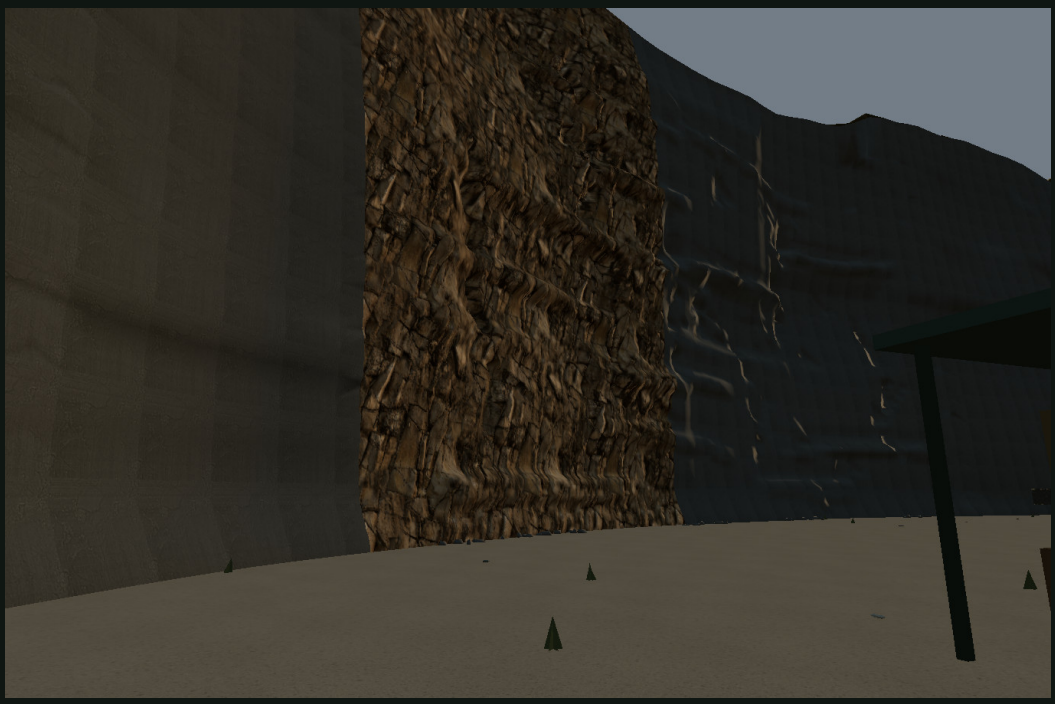

Final build control: c8-3x · scale 1

Final-build control or diagnostic. The full PNG and original metadata are retained in the gallery.

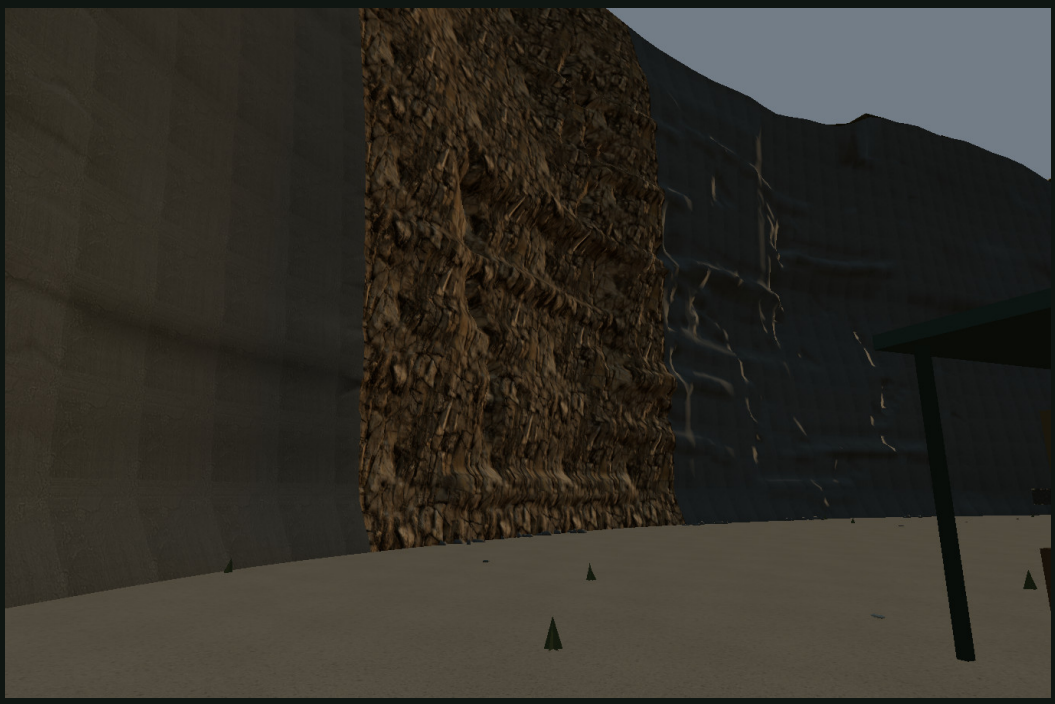

Final build control: c8-3x · scale 4

Final-build control or diagnostic. The full PNG and original metadata are retained in the gallery.

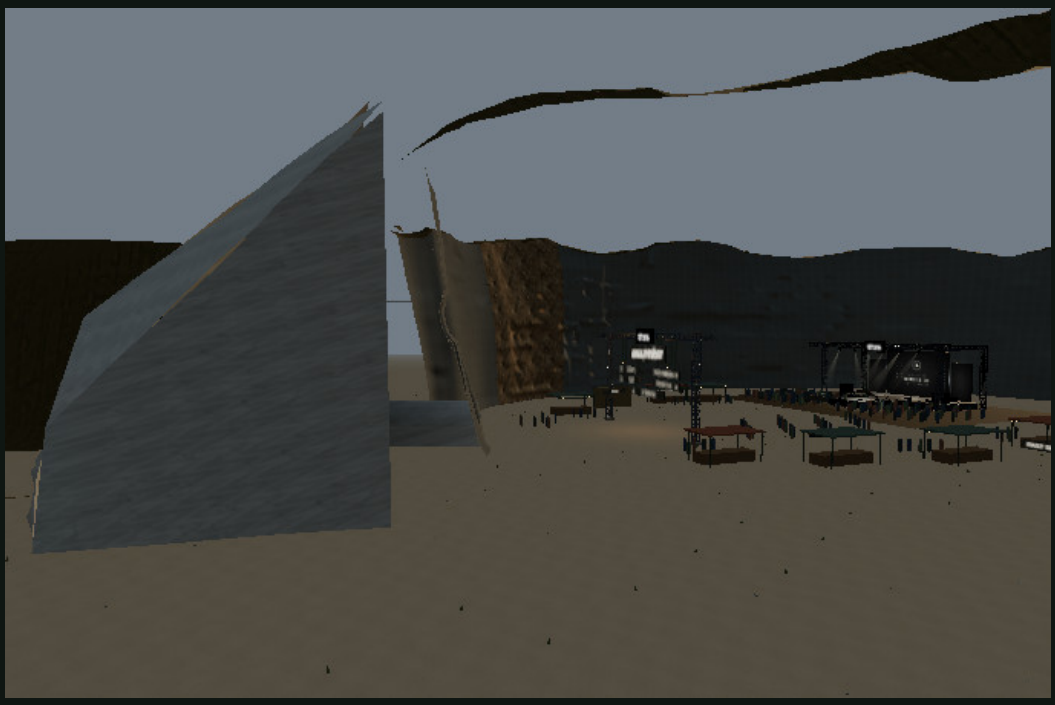

Final build control: c8-3x · scale 3

Final-build control or diagnostic. The full PNG and original metadata are retained in the gallery.

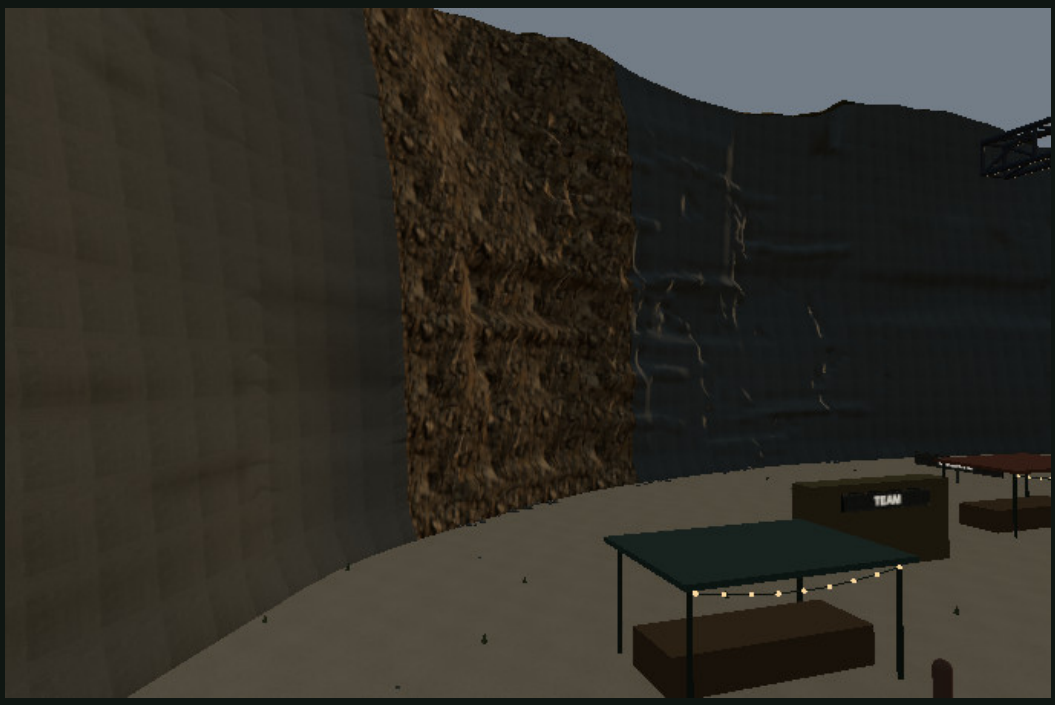

Automatic LOD — non-public inspection: automatic-lod-far

Final-build control or diagnostic. The full PNG and original metadata are retained in the gallery.

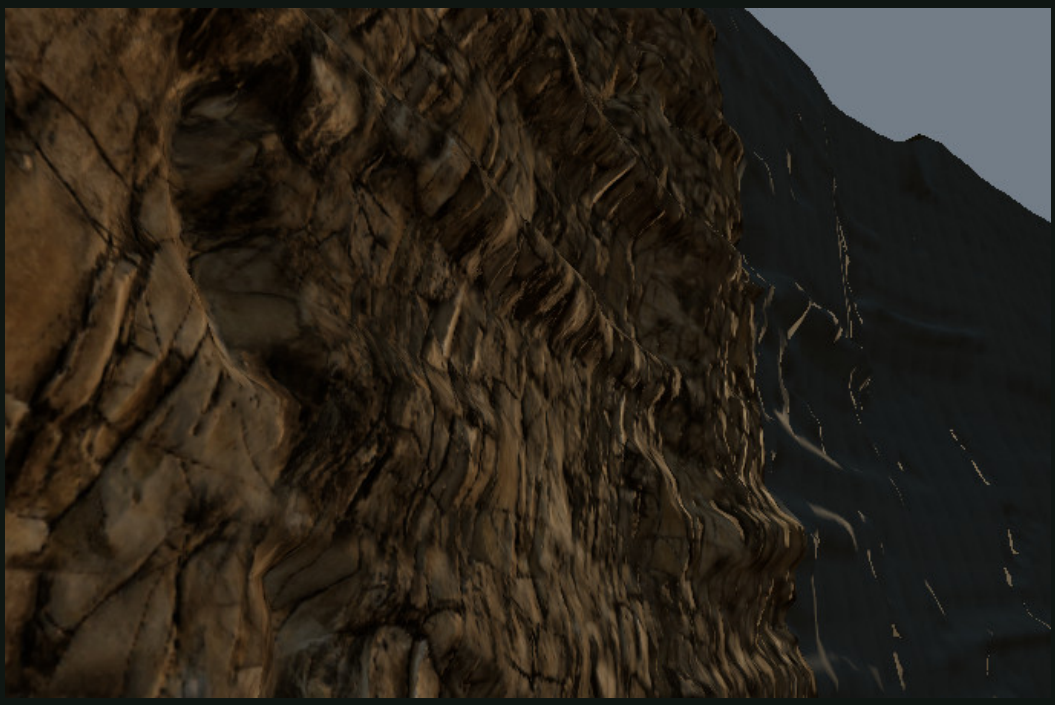

Automatic LOD — non-public inspection: automatic-lod-middle

Final-build control or diagnostic. The full PNG and original metadata are retained in the gallery.

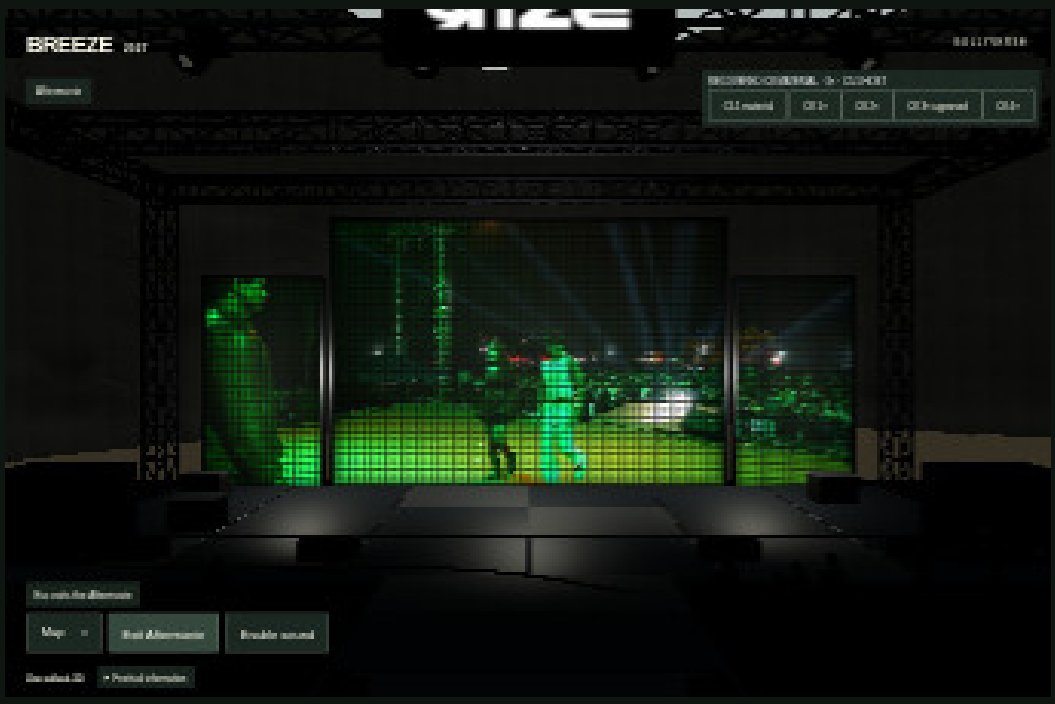

Automatic LOD — non-public inspection: automatic-lod-near

Final-build control or diagnostic. The full PNG and original metadata are retained in the gallery.

Original Aftermovie playback with C8 owner preserved

Final-build control or diagnostic. The full PNG and original metadata are retained in the gallery.

Reference and remaining limitations

Project quarry reference; review use only, not a runtime texture.

The scan provides strong mineral grain and fractured-looking normal detail. It does not replace the smooth C5.1 geological forms, thin bright legacy fractures or the visible material boundary.

One original sector, 21.950 m in perimeter arc, is the smallest whole-mesh host used here. Its full-height shape differs from the missing historical 35.557 m C6.2 study. No geometry or UV1 bake was invented.

3 unique new images, approximately 32 MiB decoded RGBA8+mips; 5.41 MB material GLB. Detailed measured loading, frame times and regressions are in the technical report/JSON. SwiftShader is not physical GPU certification.

C9 reconstruction and cave work remain unstarted. Stop for visual review; historical matching and physical-device acceptance remain pending.
